

ICAgile Agile Fundamentals

In today's fast-paced world, teams must adapt quickly to survive and thrive. This Agile Fundamentals (ICP) course is you and your team's gateway to mastering the agile mindset, essential for success in the AI era.

- *Rigid processes slowing down your team's productivity?*
- *Difficulty adapting to rapidly changing demands?*
- *Lack of collaboration between team members and stakeholders?*
- *Trying to do too many things at once?*
- *Delivering products / services which don't meet expectations?*
- *Missed deadlines and budget overruns?*

Agile Fundamentals (ICP) is an industry-recognised credential, which demonstrates an understanding of the agile mindset, values, principles, and foundational concepts. Professionals are grounded in what it means to "be agile while doing agile" and achieve organisational agility without specific focus on any single agile methodology or framework (i.e. Scrum, Kanban, XP, DSDM, SAFe, etc.)

Course Highlights

ICAgile Certified:

Earn a globally recognised certification

Framework-Agnostic:

Learn core agile principles applicable across methodologies

Hands-On Learning:

Engage in interactive simulations and exercises

Immediate Application:

Gain skills you can implement right away

Agile Fundamentals

The Agile Fundamentals (ICP) course empowers teams to excel in today's fast-paced work environment. This ICAgile-accredited program introduces the Agile mindset, values, and principles, suitable for both software development and other business contexts. Through hands-on exercises, participants experience Agile techniques firsthand, forming self-organising teams and managing backlogs.

The curriculum covers Agile history, interpersonal dynamics, value-driven development, and adaptive planning. Professionals learn to enhance cross-functional collaboration, improve stakeholder engagement, and deliver value more effectively. Ideal for new Agile team, members and those seeking to apply Agile principles across diverse settings, the course is available in-house, remotely, or as open training.

Join us to boost your team's effectiveness, collaboration, and customer satisfaction in an ever-changing business landscape.

Training Options:

- Through our Open Training hosted online
- In-house tailored to your specific needs

- Collaboration Techniques
- Techniques for Shared Understanding
- Shifts in Roles

Value-driven Development

- Incremental Development
- Value-based Work
- Retaining Quality
- Work-in-progress
- Continuous Integration
- Cost and Benefit of Frequent Delivery

Customer and User Involvement

- Defining the Customer
- User Involvement
- User Feedback

Planning and Adapting

- Planning
- Estimation
- Status
- Process Adaptation

Product Adaptation

What Our Learners Say:

This was the first time I've heard someone talk about Agile as a mindset rather than a set of tools-mind blown! Instructor was brilliant, pace and levels of engagement were spot on!

I enjoyed this online training more than some physical training sessions I've attended. It was so dynamic and the interaction with the other members makes it unique. The content was extremely informative and incredibly useful.

Exceptional instructor - extremely knowledgeable, sharing an abundance of experience to bring the subject to life, with an incredibly engaging and enthusiastic teaching style.

One of the best training courses I've been on because it was so interactive, and the instructors really knew what they were talking about. The use of the posters around the room worked really well and getting people to move about and stick post-it notes up was a good way to keep energy high.
